

This is no bundy clock. It's a breakthrough for small business.

Upgrade now and get all the advantages of a comprehensive electronic attendance management system for little more than the price of the average bundy clock. The new AMS Mini-Minder runs on the same Time-Minder Version 5 software that operates our full-scale systems, but it comes in a streamlined package designed and priced to suit businesses of up to 50 people.

Add up the time your office staff will save shuffling bundy cards and keying in information. Shift allowances and over-time can be calculated automatically and Mini-Minder links directly into your payroll program*, saving even more time. Attendance times can also be checked daily so that at the end of the week the figures can be finalised quickly and easily.

With fully computerised records you have immediate access to all historical information, and preparing detailed management reports takes only moments instead of hours of laborious work. And while the Mini-Minder system is simple enough to install yourself, we also offer an on-site installation and training service, which includes customising the software to your individual needs, and on-going Helpdesk Support.

AMS MINIMINDER

Attendance Management Systems P/L ABN 98 074 029 324
